RESEARCH & QUALITY IMPROVEMENT EXPERIENCE

Co-Lead, Autologous Cranioplasty Infection Reduction Project; February – June 2016
In setting of Clinical Safety & Effectiveness Course developed and implemented, via staff training and physician buy in, evidence based protocol that reduced infections from autologous cranioplasty by >50% at single center
University of Texas Health Science Center
San Antonio, TX

Research Resident, Lab of Viktor Bartanusz; July 2014 – April 2015
Studied the effect of acetazolamide on aquaporin-4 expression following injury in an in vitro oxygen-glucose deprivation model and in an in vivo closed head injury mouse model
University of Texas Health Science Center
San Antonio, TX

Co-Lead, Conservative Policy for Intraoperative Monitoring in Spinal Surgery Project; September 2013 – October 2014
Helped develop evidence based protocol limiting the use of intraoperative neuromonitoring during routine spinal surgery. Changes based on this quality improvement project lead to yearly savings >\$500,000 without patient safety compromise
University of Texas Health Science Center
San Antonio, TX
