NOTICE OF PRIVACY PRACTICES

THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION. PLEASE REVIEW IT CAREFULLY.

Neurosurgical Associates of San Antonio, P.A. (NASA) uses and discloses health information about you for treatment, to obtain payment for treatment, for administrative purposes, and to evaluate the quality of care that you receive. You may request a copy of this notice at any time.

How Neurosurgical Associates of San Antonio, P. A. May Use or Disclose Your Medical Information

Treatment: NASA may use and disclose your medical information to those involved in your treatment. For example, the physicians in our office are specialists. When we provide treatment, we may request that your primary care and/or referring physician share your medical information with us. Also we may provide your primary care and/or referring physician information about your particular condition so that he/she can appropriately treat you.

Payment: NASA may use and disclose your medical information to bill and collect payment for the services provided to you. For example, a claim may be sent to you or a third-party payor, such as an insurance company or health plan. The information on the claim may contain information that identifies you, your diagnosis, and treatment provided.

Medication History: NASA has implemented an electronic medical record system in order to improve the quality of our services and patient care. This system also allows us to collect and review your "medication history." A medication history is a list of prescription medicines that we or other physicians have prescribed for you. This list is collected from a variety of sources, including your pharmacy and your health insurer. An accurate medication history is very important to helping us treat you properly and in avoiding potentially dangerous drug interactions. This information will become part of your medical record. Your medication history might not include over the counter medicines, supplements or herbal remedies which you will be required to list on our patient intake form. Therefore it is important for you to disclose all medications you are currently taking (prescribed and over the counter).

Health Care Operations: NASA may use and disclose health information about you for operational purposes. For example, your health information may be disclosed to members of the medical staff, risk or quality improvement personnel, and others to:

- Evaluate the performance of our staff
- Assess the quality of care and outcomes in your case and similar cases
- Learn how to improve our facilities and services
- Determine how to continually improve the quality and effectiveness of the health care we provide.

Appointment Reminders and Treatment Calls. NASA may contact you by telephone, mail, or both to provide appointment reminders, information about your treatment plan, medication or test results. When contacts are made via telephone, messages may be left on answering machines with physician name, person calling, and telephone number.

Disclosures That Can Be Made Without Your Authorization: There are situations in which we are permitted by law to disclose or use your medical information without your written authorization or an opportunity to object. In other situations we will ask for your written authorization before using or disclosing any identifiable health information about you. If you choose to sign an authorization to disclose information, you may later revoke that authorization, in writing, to stop futures uses and disclosures. However, any revocation will not apply to disclosure or uses already made or taken in reliance on that authorization.

Public Health, Abuse or Neglect, and Health Oversight: NASA may use or disclose your medical information for public health activities such as assisting public health authorities or other legal authorities to prevent or control disease, injury, or disability, or for other health oversight activities.
